DIGITUS VGA splitter 400MHz

DC-42110
EAN 4016032255642

Through a video splitter, it is possible to use one video source to display identical image on 2,4,8,16 monitors or even more by cascading. With a video bandwidth of 400MHz and the consequent high video resolution these video splitters are ideal test bench facilities, data centers, help desks, video broadcasting, presentations and educational facilities.
